Goals:

- The general purpose of the Academy is to foster knowledge of the sciences among the general public and to encourage scientific research within the state. First, through the endeavors of the thirteen sections, communication among Oregon scientists, both in the private and public sectors, is strongly encouraged and given an appropriate forum for expression. Second, the Academy promotes public appreciation for scientific research and the teaching of science within the state by awarding a prize to the outstanding Oregon scientist. The Academy also sponsors a Junior Academy comprised of high school students. Third, the Academy holds an Annual Meeting for the presentation of research by professional scientists.
